

Introducing the Winegard Connect 4G1, a fully integrated system that works together for maximum security, faster RV internet speeds, and increased range from any WiFi source. Plus, when WiFi is not available, it links to a reliable nationwide 4G LTE network for uninterrupted RV internet streaming while traveling anywhere. The Winegard Connect helps keep your mobile devices, media players, and computers connected to the internet wherever the road may take you. Get ready for a consistent connection and expanded coverage everywhere nationwide.

Key Benefits for Your Customers

Connect - to 4G LTE when WiFi is not available.

Simple - Step-by-step on screen instruction makes setting up a breeze. Anyone can do it!

Secure - Always secure. Set-up your secure network once and you are done.

Mobile - Increase the range for mobile devices inside and around your RV.

Streaming - MIMO technology provides improved range of transmission in places with a large concentration of connected devices such as RV parks and sporting events.

3X3 MIMO Advantage - MIMO technology provides higher signal strength, better streaming, and less interruptions.

Features and Benefits

Simple Set-Up

- Easy to follow on screen instruction
- Scan for and select WiFi network
- Connect your WiFi devices to your new extended network instantly
- Easily connects your mobile devices, smart TVs and gaming controls, one-time set-up takes just minutes

Secure Internet

- After you set-up your network, it is always secure.
- Connect Advanced WiFi protected access (WPA and WPA2 – PSK)
- Guest Network Access – separate and secure
- Double Firewall protection (SPI and NAT)
- Denial-of-service (DoS) attack prevention

Black and white models available

Increased range for
WiFi and 4G LTE signals

Secure personal connection

Simple to scan and find network

Nationwide 4G LTE coverage
with Winegard Connect data plan*

*Winegard Connect data plan
required for 4G LTE service

Integrated System

- Increase the range for mobile devices, smart TVs and gaming controls
- Multi-user MIMO-ready for faster performance to each device
- Powerful amplifier and three high performance external antennas increase WiFi range
- Easily connects all your devices to secure WiFi in seconds

Streaming

- Maximizes signal for increased speeds delivering access to multiple devices
- Catch your favorite programming when others can't
- Advanced WiFi connectivity with powerful amplifiers and three high performance external antennas
- MIMO systems improve the range of transmission treating each antenna as a separate channel, giving you stronger signal strength for better streaming with fewer interruptions.

Quality Design

- Proven dome design tested to meet the demands of the mobile environment
- Durable housing materials for maximum UV and weather resistance for long lasting durability
- Designed and manufactured in the U.S.A.
- Backed by 2 years parts, 1 year labor limited warranty

Specifications

- Wireless Standard
802.11a/b/g/n/ac
- Frequency Band
2.4GHz, 5GHz Simultaneous (5GHz indoor unit only)
- Wireless Speed
2.4GHz: 450Mbps (Rx), 450Mbps (Tx)
5GHz: 1300Mbps (Rx), 1300Mbps (Tx)
- Amplifiers
Outdoor: (3) 2.4GHz amplifiers
Indoor: (3) 2.4GHz amplifiers,
(3) 5GHz amplifiers
- Antennas
Outdoor: (3) Detachable high gain 5dBi antennas,
(2) Detachable high gain 4G LTE antennas
Indoor: (3) Internal 2.4GHz 4dBi antennas
(3) Internal 5GHz 6dBi antennas

WF-4000
Winegard Connect 4G1
ODU (white) IDU (black)

WF-4035
Winegard Connect 4G1
ODU (black) IDU (black)

- Dimensions: 10.3" dia x 12.4"h
- Weight: 3 lbs.
- Ports
(1) RJ45 10/100/1000m Lan Port (IDU only)
(1) RJ45 PoE (ODU & IDU)
(2) USB 2.0 Ports
- Setup Requirements
Wireless 802.11a/b/g/n 2.4GHz network
Computer, tablet or smartphone with a web browser
- Power Rating
Switching, AC Input 100-240v, 1.5A
- Wireless Security
WEP, WPA, WPA2, WPA mixed

HOW IT WORKS

Future Proof WiFi

The majority of RV parks are utilizing a 1X1 or up to a 2X2 configuration. Winegard's 3X3 MIMO configuration will work with these lower tech configurations now and keep you covered as these campgrounds upgrade to newer technology. Ultimately, you get higher signal strength with **better streaming and less interruptions.**

WiFi signal captured by Winegard Connect is rebroadcasted through the RV for a secure connection at the fastest speed available.

CONNECTING TO NETWORKS LIKE NEVER BEFORE

Nationwide 4G LTE coverage provides consistent, in-motion connection. Winegard prepaid data plans allow for freedom and flexibility to fit your mobile life.

- Get the data you need with no annual contracts, activation fees or monthly bills.
- Prepaid data plans allow the freedom and flexibility to choose which plan is right for you (multiple plan options 1G - 20G).

Data Size	Price
1 GB	\$20
3 GB	\$35
10 GB	\$80
20 GB	\$150

FAQs

Q. Am I able to paint the Winegard Connect 4G1?

A. Do not paint any portion of the 4G1. Painting the system could damage the system and will void the warranty.

Q. Why doesn't my system have a "Scan for WiFi" button?

A: One of two things is happening. Either you have logged into the system before the outdoor antenna has fully powered up. Please wait four to five minutes for the system to fully boot before logging in. - OR - The Ethernet cable for the outdoor antenna is plugged into the Ethernet port on the indoor unit. Plug it into the port labeled "POE".

Q. The system says that it is connected, why won't web pages load?

A: Some WiFi sources do not require a password to connect but do require something before they will let you use their network. In these cases, they will often have a "SPLASH" page that requires you to either agree to their rules or enter a password before they will allow you to use their network.

These pages will not always load on the web browser that you select but instead open on your devices default browser. Sometimes browsing to a web page will also bring up this splash page.

Q. The system keeps making me log in every time I try to change screens...?

A: Check to see if you have a second window open that is connected to your Winegard Connect settings screen. Close this window and the problem should go away.

Q. What if I forget my password?

A: If you have not changed your default password, it will be listed on the back of the indoor unit. If you have changed this password, you can reset the unit using the RESET button on the bottom of your indoor unit. Press this button and your system will return to the factory settings. Once reset, the default password will unlock your system.

Q. I changed my password and nothing happened.

A: The Winegard Connect will reject any password that is not long enough. Try entering a password of at least eight characters. This will improve the security of your devices.

Q. What do I do if 10.11.12.1 does not bring up the login screen?

A: One of several things has happened. The first thing to check is the WiFi signal that your model is connected to. If this is not the Winegard Connect SSID, this address isn't valid. If you are indeed connected to the correct network, the address may have been changed. To resolve this, press the reset button on the bottom of your indoor unit. This will return the unit to its factory settings.

Q. My default SSID does not appear on my device when I search for it.

A: When the Winegard Connect first powers on or has reset for any reason, it stops broadcasting the SSID. It may take between four and five minutes from the time it regained power to start broadcasting again.

Q. I changed my Winegard Connect's SSID and was disconnected.

A: This is normal. The old SSID that you were connected to is no longer valid, simply open your device's WiFi screen and search for the name you chose for your network. Select this and enter the password.

Q. I am connected to a network but the speed isn't very good.

A. The Winegard Connect can only extend the signal range for what is available. Try moving closer to the source of the signal and logging on with your device directly. If the speed is still slow, try searching for another available network.
